

UNITREE H1-2 EXPERIENCE

AI-ready robot control.

Live awareness. Immersive control. Demo-grade presence.

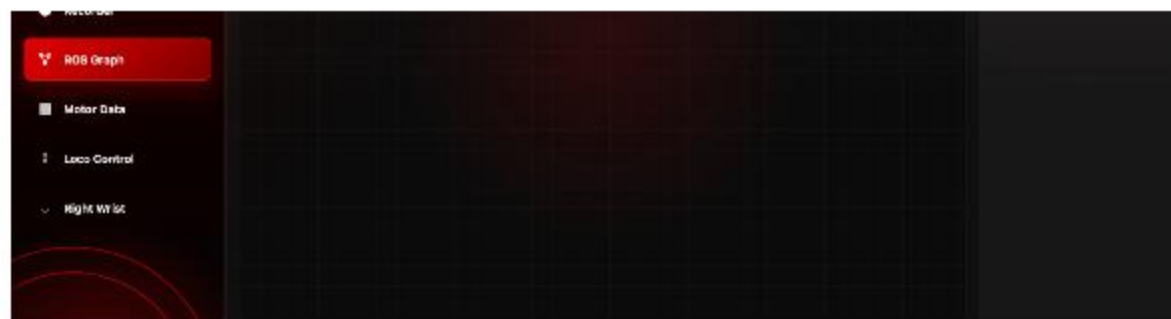

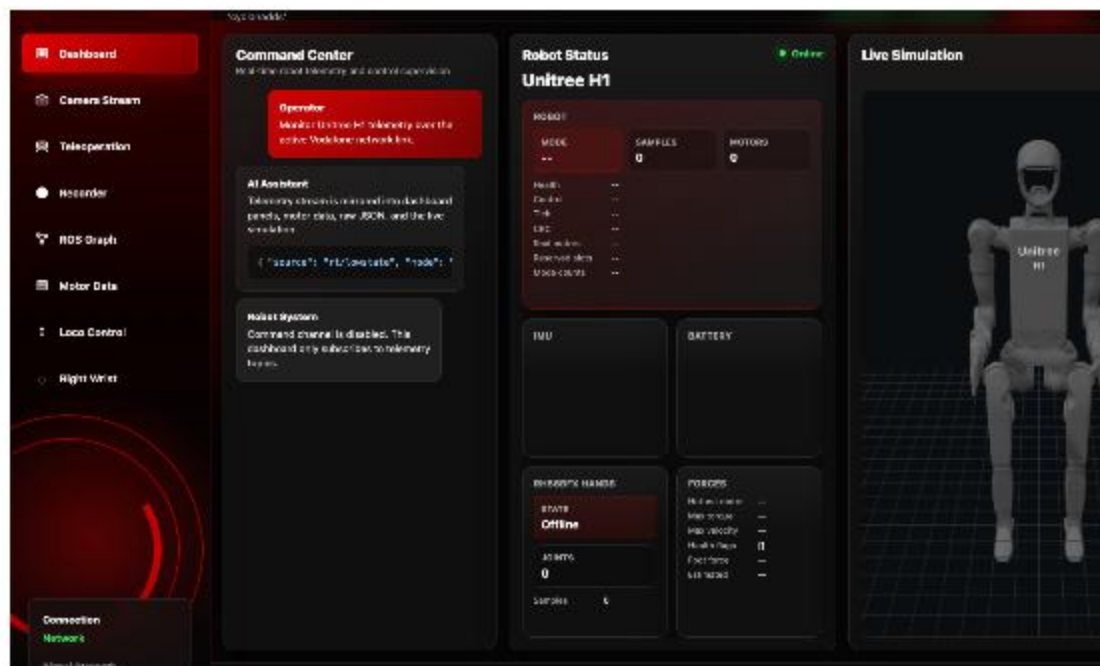

Operator confidence

Premium robotics showcase

Everything visible at once.

A single surface for live status, robot presence, motor insight, and instant readability.

Real-time awareness

Clean signal layer

Instant operator readout

Select your control method.

1. FLOATING VR CONTROL PAD

First person view from robot + your hand controls
You in 3rd person

ROBOT CAMERA (FIRST PERSON VIEW)

YOU (THIRD PERSON VIEW)

Use the floating pad to move the robot
in any direction or rotate precisely.

Floating VR Control Pad

CURRENT MOVEMENT STRATEGY

2. HEAD ROTATION CONTROL

Tilt your head to control the robot
Tilt right = robot walks right

YOU (TILT HEAD TO RIGHT)

ROBOT RESPONSE (WALKS RIGHT)

The robot moves based on
your head rotation.

Head Rotation Control

TILT AND ROTATE FOR LOCOMOTION

3. MOTION
